

PRACTICE MISSION

Our practice mission statement is a result of discussions within the team at practice meetings. It represents the goals, which we are striving to reach for ourselves and for our patients. Everyone should be aware of these goals and occasionally, you need to remind yourselves what they are.

The statement is reviewed once a year to make sure that it still applies to our practice.

For the Team:

We aim to provide a comfortable, happy working environment for all team members with mutual respect and an opportunity for all to contribute to the smooth and profitable running of the practice.

For our Customers:

The practice aims to provide a comprehensive choice of dental care of a high quality to every member of the family in an environment which is professional, but relaxed, friendly, caring and safe, with short waiting times.

We aim to do this by developing and utilising the skills of everyone in the team.
